Four decades of image processing: a bibliometric analysis

Hamza Munir

Senior Data Scientist & LLM Engineer at The Redesign Group |
Exploring LLM's and Generative AI | MS Data Science @ ITU
Lahore, Punjab, Pakistan

Summary

Seasoned Data Scientist with over 6 years of experience in Machine Learning, Deep Learning, Data Analytics, NLP, and Generative AI. I specialize in extracting actionable insights from complex data to influence strategic business decisions and integrate data science into products, enhancing product value and driving revenue growth. Skilled in handling diverse data environments, I consistently deliver top-notch results under tight deadlines. My global project leadership spans Healthcare, Academics, Agriculture, Marketing, Transportation, and Financial Services across various regions including the Middle East, USA, UK, Russia, and Australia.

Experience

The Redesign Group

Senior Data Scientist & LLM Engineer
October 2023 - Present (1 year 9 months)
Boston, Massachusetts, United States

Bookstore.ai: Developed chatbot using opensource LLMs to ask behavioral questions for personalized book recommendations, sourced data from Ingram, Amazon, and Goodreads, and created learning journeys based on users' goals, preferences, and reading history.

Developing the book recommendation engines using content-based filtering and collaborative filtering, as well as deployed the Qdrant Database for book embedding storage and querying.

Trust Portal: Spearheaded the transition from an outdated database system to a real-time data lake architecture, integrating data from cybersecurity tools and developing LLM models for enhanced data utilization.

Redesign RAG: Integrated communication and management tools like Slack, Jira, and SAP into a unified platform, enhancing connectivity with LLMs to streamline processes and improve efficiency.

Odyssey Analytics

1 year 6 months

Senior Data Scientist

May 2023 - March 2024 (11 months)

Lahore, Punjab, Pakistan

Promoted to Senior Data Scientist, leading client engagements across the MENA region, Russia, Australia, and USA.

Headed a team of four in a project with a Saudi Transport Company to oversee Hajj bus operations. Managed the analysis of 5GB daily data from 20,000 AVL devices, focusing on traffic trends, anomaly detection, and performance assessments. Implemented Dremio and data marts on MinIO to optimize data analytics, significantly improving data processing efficiency and analytical capabilities. Responsible for end-to-end project delivery.

Developed a document question-answering system for a Saudi client using LangChain RAG, focusing on Arabic Language Religious Ahadees and Quranic Verses using open source language models.

Developed a Classical Machine Learning based system to predict churn among farmers in the Agriculture Domain.

Skilled in utilizing data-driven strategies and advanced analytics to enhance business processes, extract actionable insights, and support decision-making. Demonstrated expertise in communicating complex technical concepts to non-technical stakeholders and staying current with data science trends and developments.

Research Scientist ML

October 2022 - May 2023 (8 months)

Lahore, Punjab, Pakistan

- Leading ML Research Team in the Development of a Product Natural Language Question Answering System on Knowledge Graphs (NLQA-KG).
- Investigated and implemented various tools and techniques for transforming structured data into knowledge graphs, culminating in the creation of an NLQA system.
- Researched key applications of Knowledge Graphs and Defined Product Usecases, resulting in the successful design of a comprehensive product.
- Leading the development of a product as a Product DRP, collaborating with the Product Owner, Data Engineers, Frontend Engineers, and Backend Engineers to ensure the product delivers on time and to specification.

Dice Analytics

Trainer Deep Learning Course

February 2020 - December 2022 (2 years 11 months)

Islāmābād, Pakistan

- Enabled 300+ participants to learn Python Programming, Data Science, Natural Language Processing, Computer Vision, Neural Networks, CNNs, RNNs, LSTMs, GANs, etc.
- Provided Corporate training to an organization like ZONG CM PAK.
- Keep the content up-to-date to teach the industry trending topics.
- Design and evaluate participants, projects, assignments, and quizzes.

Soliton Technologies

Data Analyst

April 2021 - October 2022 (1 year 7 months)

Lahore District, Punjab, Pakistan

- Data Mining from unstructured Big Data Repositories, JSON Files, and SQL Databases.
- Data Analysis, Validation, Visualization, Feature Engineering, and Aggregation on Highly Dimensional Data.
- Read Research Papers, Prepare Data, and Build ML/DL models to Predict Annual Medical Claims Costs, Heart Failure Hospital Readmission, and Other Readmission problems.
- Text Mining and Text Segmentation to mine required information from the Patient's Clinical Note using NLP Techniques (Regex, NER, Spacy, Indexing, Pattern Recognition, etc.)
- Build Medical Problems Entity Recognition (NER) models to identify and extract diseases from the unstructured Clinical Notes.
- Worked with multiple teams like Clinical, Claims, ACO, and Platform, and reported directly to Company's CEO and CTO.

WALEE

Data Associate

November 2019 - October 2020 (1 year)

Islamabad

- Build crawlers to collect data from Social Media Platforms (Twitter, Instagram, Tiktok, Youtube, and Facebook).
- Build Generic Crawlers for similar niche websites, Search Engines, E-commerce websites, etc.
- User Segmentation, User Persona Analysis, Time Series Analysis, Users Anomalous Behaviour Detection, Fake Profile Detection, etc.
- Worked on MongoDB Database Cleansing, Data Integrity, Query Testing, and wrote new Aggregation queries for Dashboards.
- Assisted the development team by building Data Analytics, Data Collection, and different data-oriented APIs using Flask.

- Build and deployed Deep Learning and Machine Learning models for User Profile Verification using CNN, Record Deduplication using Clustering Algorithms, and Sentiment Analysis on User's Social Media data.
- Designed and managed end-to-end campaigns of different Businesses on Facebook Ads Manager.

Snapthat, Inc.

Data Engineer

April 2019 - September 2019 (6 months)

Islamabad

- Collected, analyzed, and interpreted raw data from various websites
- Developed and implemented generic crawlers to automate the data collection process
- Acquired Deep Learning skills under the supervision of the Team Lead.
- Participated in monthly meetings with executives, and provided information on the progress.

Education

Information Technology University

Masters, Data Science · (2020 - 2023)

COMSATS University Islamabad

Bachelor of Science - BS, Computer Science · (2015 - 2019)
